

🔦 11 Hours Replaceable Battery

Finder V2 is equipped with two lithium-ion battery packs, which can be replaced easily even in a dark environment. The total battery life can reach up to 11 hours, and the charger supports in-vehicle charging, enjoying uninterrupted observation.

Model	FH35R V2
Resolution, pixel	640x512
NETD, mK	≤20
Objective Lens, mm	F35/0.9
Field of View, °	10.5x7.9
Magnification, x	2-8
Detection Range, m(Target size: 1.7m×0.5m, P(n)=99%)	1800
Max. Rangefinder Distance, m	800±1
Display Screen	1024x768 AMOLED
Battery	Replaceable Li-ion Battery pack, 5hoursx2
Weight (with battery pack), g	<400
Dimension, mm	160x90x50

FH35R V2

InfiRay Outdoor 🔍

Enhanced Clarity in Imagery

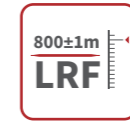

The 12 μ m 640x512 thermal sensor is upgraded to higher thermal sensitivity, reaching an NETD of Sub 20mk. In combination with the enlarged F0.9 aperture which allows for more radiation, Finder V2 is able to capture perfect details in challenging conditions.

NETD ≤ 20 mk

Agile and Precise LRF

Finder V2 features an up to 800 meters built-in LRF with a margin of error within 1 meter. The response rate is super quick, accurate rangefinding results can be presented without lag.

Finest Body Design

Finder V2 keeps the pocket-size design, IP67 waterproof & dust-proof rating, in the meantime, optimize the button material. The improved silicone button can still retain soft touch in cold temperatures.
